

PROJECT TITAN - RESEARCH & SPECIFICATION REPORT

Author: Dr. Elena Vance

Document Classification: Internal Engineering Standard

1. Operational Milestones

The formal deployment launch date for Project Titan is firmly scheduled for November 14, 2028.

The total research and development operational budget allocated for this initiative is exactly \$4.2 million USD.

2. Subsystem Architecture

Dense semantic vector retrieval utilizes 768-dimensional embeddings with cosine distance metrics in Qdrant.

Sparse lexical retrieval is performed using BM25 token indices fused through reciprocal rank fusion.
