

# EXECUTIVE TECHNICAL DOSSIER: PROJECT OMEGA QUANTUM CORE

Classification: Level-5 Confidential Engineering Standard

Lead Architect: Dr. Aris Thorne

## Section 1: Quantum Telemetry Specifications

The primary cryogenic containment sub-zero operational temperature is calibrated to exactly 4.15 Kelvin.

The superconducting flux quantum qubit coherence time threshold is specified at 128.4 microseconds.

## Section 2: Security and Encryption Directives

All inter-cluster telemetry channels are secured with post-quantum lattice-based Kyber-1024 encryption keys.

System heartbeat intervals are broadcast every 250 milliseconds with SHA3-512 authentication signatures.
